github.com/federicogfb

Confident in my capabilities, capable of learning anything. Former Software Development student turned DevOps. Since kid I've been interested in computers and four years ago I decided to transform this hobby of mine into my profession.

PROJECTS

Craftech Academy Challenge 2021.

CI/CD pipeline that uploads to Dockerhub and deploys Kubernetes manifests into Minikube.

URL - <https://github.com/federicogfb/craftech-academy-final-2021>

Terraform Practices.

Practices to gain experience and knowledge in Terraform and IaC.

URL - <https://github.com/federicogfb/terraform-practice>

Working Simulation by No Country.

Building a web app in a multidisciplinary group in which I fill the DevOps role. My tasks were to dockerize the app and to build pipelines so my developers can stay focused solely on developing.
